

A PRACTICAL SELF-CHECK FOR SMALL CLINICS & MID-SIZE PRACTICES

What is stretching your clinic right now?

Choose one pressure. PrimeVital helps you build the working model around it.

You should not have to choose between patient follow-up, claim follow-up, and staffing gaps.

PrimeVital brings the operational detail, experienced people, and accountable handoffs behind the work.

01 CARE BETWEEN VISITS

**Patients need follow-up between visits,
but your team cannot chase every reading and call.**

PRIMEVITAL RESPONSE

Connected monitoring, enrollment, outreach, escalation, and documentation that turn meaningful signals into owned clinical work.

02 REVENUE ALREADY EARNED

**Care is being delivered, but eligibility, documentation,
and follow-up break before payment.**

PRIMEVITAL RESPONSE

RCM support across eligibility, charge capture, claims, denials, A/R, and the operational handoffs that protect collectible revenue.

03 COVERAGE & CONTINUITY

**One absence or unfilled role becomes
a patient-care and leadership problem.**

PRIMEVITAL RESPONSE

U.S.-based RN/LVN staffing matched to the role, workflow, schedule, and patient population - for continuity, not simply a vacancy.

START WITH THE PROBLEM - NOT A PRESELECTED PACKAGE

Connect care. Protect revenue. Build capacity.
